Art Unit: 2166

Restriction to one of the following inventions is required under 35 U.S.C. 121:

*sl*

- I. Claims 46-<sup>88</sup>~~48~~, drawn to methods for conducting and supporting postal franking classified in class 705, subclass 401.
- II. Claims 1-45, drawn to a processing apparatus with processor and printing apparatus with print heads, classified in class 700, subclass 90.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice other and materially different processes. A computer processor can perform word processing, create spreadsheets, process e-mail, and communicate with the Internet. A print head on a printer can print conventional letters and type addresses for envelopes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

If applicant elects group I, an additional election requirement will be necessary, as set forth on the next page. If applicant elects group II, the additional election requirement as set forth on the next page is not applicable.

Art Unit: 2166

This application contains claims directed to the following patentably distinct species of the claimed methods:

- I Claims 46-57 Arrangement of Postal Data Elements
- II Claims 58-76 Identification of Data Candidates
- III Claims 77-82 Performing Computations To Generate Code
- IV Claims 83-88 Separating Printheads to Print Segments

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims 46-88 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 2166

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
